2018 Cathedral Range

Not limited to Cathedrals alone this range of products takes fabulous works of art, typically stained glass windows; logo's and branding ideas and turns them into merchandise for visitors to keep as souvenirs of their visit.

This high quality image of the grand Bishops Eye Rose Window in Lincoln Cathedral was used to create a range of products.

The image shown here and the Deans Eye Rose Window were used to produce High definition Crystal Lensed flexible fridge magnets and Coasters

The glass was digitally removed from the rose window image leaving the tracery alone and this was used to create an inspired sterling silver necklace and earring set

The existing branding of the Cathedral was used to create a stunning range of engraved glassware and the packaging

Solid Cork-Backed Coasters

Our high definition "Crystal Lens" process enhances images giving them a backlit screen effect of unique quality and enhanced feel impossible to recreate with traditional printing techniques.

All lensed items are printed to museum quality standards are protected using a clear epoxy doming resin. Hold and touch them, dig your nails into them and watch the mark bounce back without leaving a trace. The domed effect also gives a magnification and enhances the striking high image quality.

Packaging and Story telling

As with most of the products produced by Ancestors® the packaging and/or romance cards tell the story of the item enclosed.

Jewellery items generally have romance cards that include a picture of the original artwork that inspired it's creation together with historical information or other details.

Other items mostly have Eurohooked packaging that includes space on the reverse to tell the story.

All can include barcodes and other site specific information and branding.
