Free point of sale available

Frizc flavour cards are made using smart evaporation, which is a new innovation developed and patented. Any flavour, scent, or functional chemical can be transferred to a surface or liquid, thus enabling active evaporation. Frizc uses food-grade ingredients.

To use the flavour cards, consumers would simply have to drop the flavour card, in the pack, leave it for some time, and voila! – the goods are flavoured.

Frizc flavour cards are sold in outers of 25 (TP-08-75)
